EDUCATION

iBSc in Computer Science | Lassonde School of Engineering, York University

Toronto, ON

Cumulative GPA 8.27/9.00, Member of Dean's Honour Roll

Graduating Apr 2028

- President's International Scholarship of Excellence & International Award for Academic Excellence (\$190,000 value)
- Leadership: President (BSAY), Founder (Leo Club of Dhaka 400 | Lions International), Operations (SOON Hackathon)

WORK EXPERIENCE

Field Education Program Associate

May 2026 – Present

York University – Faculty of Liberal Arts & Professional Studies

Toronto, Canada

- Identified and quantified **76** platform issues across 6 months by collecting and categorizing data from **250+** students and **250+** field instructors, then built a formal vendor replacement proposal and presented findings to school directors
- Evaluated 2 replacement vendors (InPlace Software and CORE Higher Education), mapped requirements against current pain points, and arranged product demos for decision makers
- Reconciled monthly budgets using e-Reports, tracked expenses against cost center codes, and maintained accurate financial and operational records across the entire program

AI Product Development Intern

Apr 2026 – July 2026

Herb Immortal | myherbalshop.ai | herbimmortal.com

Toronto, Canada

- Implemented a full data pipeline from user input through validation and status tracking to an admin CRM dashboard, maintaining data accuracy across investor leads, contact submissions, and content management
- Reduced API response time by **70%** across a REST API serving **500+** users and **50+** doctors through query optimization and parameterized requests

Operations

June 2026 – Present

SOON Hackathon

Toronto, Canada

- Coordinating all operations for Canada's first private hackathon in a mansion with **50-60** selected attendees and a **\$25,000** budget covering venue booking, vendor coordination, and logistics
- Managing international vendor relationships across China and Bangladesh to design, produce, and ship **7** merch products to Toronto within a tight pre-hackathon deadline

Founder and CEO

Feb 2020 – Apr 2023

Outrageous Dominance

Toronto, ON

- Scaled a competitive gaming club from 0 to **2,000+** Discord members, raised **\$5,000** in funding, and managed operations across **50+** players and **20+** tournaments

PROJECTS

National Livestock Registry - Trinidad and Tobago

June 2026 – July 2026

- Designed and built a PostgreSQL database with **7** migrations handling real owner PII and animal records at national scale, with parameterized queries and soft deletes to ensure data integrity
- Defined system requirements, role architecture across 4 user types, and infrastructure planning for a government-grade system targeting **2,000-3,000 MAU**

Student Helper - AI-Powered Learning Platform (1st Place @ BEST Startup Experience)

Sept 2024 – Present

- Conducted market research across 4 competitors, identified product gaps, and defined a differentiated solution that reached **1,000+** unique logins in one summer and won 1st Place at BEST Startup Experience
- Built an ML pipeline predicting student final exam scores using Linear Regression, Decision Trees, and Neural Networks trained on real LMS data

SKILLS

Analysis: requirements gathering, process mapping, competitor analysis, vendor evaluation, data-driven decision making

Data: SQL, Excel (advanced), Power BI, Python (pandas, NumPy), statistical analysis, data pipeline building

Tools: Jira, Microsoft Office Suite (Excel, Outlook, SharePoint), Zoom, Git, REST APIs, Machform

Technical: PostgreSQL, MySQL, Node.js, JavaScript, REST APIs, structured JSON logging
