EDUCATION

iBSc in Computer Science | Lassonde School of Engineering, York University
Cumulative GPA 8.27/9.00, Member of Dean's Honour Roll

- President's International Scholarship of Excellence & International Award for Academic Excellence (\$190,000 value)
- Leadership: President (BSAY), Founder & Vice President (Leo Club of Dhaka 400 under Lions International), Operations (SOON Hackathon), Captain (Lassonde WeekZero)

Toronto, ON
Graduating Apr 2028

WORK EXPERIENCE

AI Product Development Intern
Herb Immortal | myherbalshop.ai | herbimmortal.com

- Reduced API response time by **70%** across a MySQL-backed REST API serving 500+ users and 50+ doctors through optimized queries and parameterized requests
- Designed and shipped an AI-powered patient-doctor matching platform live in production, integrating personalized recommendation logic serving **500+** active users
- Implemented full data flow from user input to database storage to admin dashboard, covering data accuracy, validation, and status tracking across multiple pipelines
- Architected two-factor auth from scratch using email OTP and JWT with zero third-party auth dependencies across the entire application

Apr 2026 – July 2026
Toronto, Canada

Research Assistant
York University

- Built Java-based discrete-event simulation modules to model and analyze blockchain consensus mechanisms, processing and interpreting large volumes of simulation output data
- Designed hashpower experiments and PoW runtime simulations to evaluate mining behavior patterns across different protocol conditions

Jan 2026 – Apr 2026
Toronto, Canada

Field Education Program Associate
York University – Faculty of Liberal Arts & Professional Studies

- Identified and quantified **76** platform issues across 6 months, built a formal vendor replacement proposal and presented findings to school directors and the dean
- Coordinated 2 large-scale seminars and onboarded **20+** contract faculty advisors for the upcoming placement cycle across **250+** students and **250+** field instructors

May 2026 – Present
Toronto, Canada

PROJECTS

National Livestock Registry - Trinidad & Tobago

- Designed and built a PostgreSQL database with 7 migrations handling real owner PII and animal records at national scale, with parameterized queries and soft deletes to ensure data integrity
- Designed for **2,000-3,000** MAU at national scale, solo-built across web, mobile, and REST API sharing one backend

June 2026 – Present

Student Helper - AI-Powered Learning Platform (1st Place @ BEST Startup Experience)

- Built an ML pipeline predicting student final exam scores using Linear Regression, Decision Trees, and Neural Networks trained on real academic performance data from university LMS platforms
- Reached **1,000+** unique logins in 1 summer through direct Knowledge Tracing dashboard built with D3.js and Chart.js

Sept 2024 – Present

HirezzAI - Resume Roaster (Audience Choice @ Sandcastle Hackathon by Sandbox)

- Built an AI resume analyzer scoring resumes against job descriptions across 5 dimensions using Gemini 2.0 Flash, reaching **100+** users on day one
- Chained **4** external APIs with tested fallbacks ensuring zero failures during demo, built with Next.js 15

May 2026

SKILLS

Languages: Python (pandas, NumPy, SciKit-Learn), Java, SQL, JavaScript, Node.js
Databases: PostgreSQL, MySQL, Firebase, Neo4j
Tools: Power BI, Excel (advanced), Git, Jira, REST APIs, D3.js, Chart.js
Competencies: Data pipelining, statistical analysis, ML modeling (Linear Regression, Decision Trees, Neural Networks)
